The Newton City/County Airport Industrial Park has approximately 70 acres of land ready for development. Industrial capacity city water and sewer systems already encircle the area. Underground utilities run along side the entire airport complex providing convenient access at energy levels sufficient for almost any industrial application.

Business interests of a non-aviation nature are as attracted to this Industrial Park as those with aviation connections. Land area is available with direct access to the Airport Operations Area taxiways and paved surface vehicle roads. Both are well maintained for year around operation. Located in the unincorporated part of Harvey County, the Newton City/County Airport Industrial Park is located conveniently two miles east of Interstate 135, U.S. Highway 50 and the City of Newton.

Airport Facilities can be Tailored to Help Your Company Bottom Line

You choose - Retain the facility as an asset on your balance sheet. Unlike most airports, the Newton City/County Airport has led the way in adopting policies that will allow very long ground leases ***without a reversion clause***. This allows you to retain your facility as an asset for as long as you wish. Although the airport allows private ownership of buildings, the FAA restricts the sale of airport land. Long term lease arrangements are readily provided by airport management. Airport management also works closely and actively with industrial park prospects and tenants in the design phase of their projects to insure their construction on or additions to the property comply with FAA guidelines and airport regulations.

Or use the facility as a business expense.

The Newton City/County Airport also offers a True Lease build-to-suit program for buildings on the airport. Buildings erected under this program are constructed for a company that is willing to sign a long term lease on the facility. Leases of 10 years with multiple options to extend are available. These facilities can be tailored to the lessee's specific needs in most cases, but are constructed and wholly owned by the

airport and remain the property of the airport. The airport offers a generous comprehensive maintenance program in conjunction with the lease of these buildings. The airport on site staff is always available to maintain the essential structure of the building as well as the plumbing, electrical and HVAC. The business would be responsible only for the consumables in the structure and damage due to negligence.

The wide open land area surrounding this airport industrial park provides nearly unlimited opportunity for business development. Whether manufacturing or warehousing, the space to meet your business needs is available. Truck fleet maneuvering, staging and parking for product distribution is not a problem, whether a business needs 10,000 square feet, or 300,000 square feet of facilities, and/or acres of land area for employee and fleet parking. Newton City/County Airport Industrial Park can accommodate that facility with room for growth.

Presently, there are 15 independent businesses occupying the 25 buildings and industrial facilities at the Airport Industrial Park. The following businesses call Newton City/County Airport their base of operation:

AirMD LLC/LifeTeam provides air ambulance contract services to medical facilities throughout Kansas. The Newton headquarters not only handles aircraft maintenance for their fleet of Bell helicopters and King Air turbo-props, but also pilot an aviation nurse training and certification.
